GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California, riparian and appropriative rights.

A **riparian right** enables an owner of land bordering a natural lake or stream to take and use water on their riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available, including the following:

Instructions

A statement should be filed except where—

1. The diversion is on file with the State Water Resources Control Board by means of an application, permit or license.
2. The water is pumped from a ground water basin.
3. The water is diverted from a spring that does not flow off the property on which it is located.
4. The diversion is supervised by a state-appointed watermaster.
5. The diversion is included in annual reports filed with the State Water Resources Control Board or with a court by a watermaster appointed to administer a court decree determining the rights to divert water.
6. The diversion is on file under the recordation of ground water extractions law.
7. The diversion is reported by the Department of Water Resources in its annual hydrologic bulletins describing certain major diversions from the Sacramento River and major tributaries.
8. The diversion is in the Sacramento-San Joaquin River Delta lowlands.

More specific information defining the types of diversions for which statements are not required may be obtained from the Division of Water Rights of the State Water Resources Control Board.

A separate statement should be filed for each point of diversion.

A duplicate copy will be returned for your file.

SURNAME

June 14-90

State Water Resources Control Board:

I am Norma Perry - I'm helping my father Jesse James with his affairs now. I went through his water records & found an extra Supplemental Statement of water diversion & use paper; so am filling it out for 1990. These use to come in about ever 3YR's. I don't want it to lapse, as we still use the water ever year. When Dad goes - He is leaving the Ranch to us girls & I want these water rights left with the land.

There is a man here that made statements to a friend of mine, that he was going to fill for our rights when Mr. James dies. I don't want that to happen, so send me up more of these forms & I'll send you one ever year to make sure no one takes the water right away from us. Or what ever I have to do - Please let me know.
